Textbook Barnett, et al., *Finite Mathematics for business, economics, life sciences, and social sciences*, tenth edition

Final Exam Monday 8:00 - 10:00 AM, May 8, 2006

Midterm Exams Thursday February 23, and Thursday March 30

Homework will be due every Tuesday, and will cover material presented in the previous week.

Quizzes Short (less than 15 minutes) quizzes will be given each Tuesday, covering material presented in the previous week.

Objectives We will cover basic concepts in finite mathematics and their application to business problems. Concepts are developed and presented intuitively, without the rigor of technical proofs. The course is intended for non-majors.

Grading The most frequent evaluation will be in the form of weekly homework and quizzes. Students will be permitted to drop the lowest score in each of these categories. Missed quizzes will not be made up, except in extraordinary circumstances. There will be two midterm exams and one final exam, which is weighted double. The grades are weighed as follows:

Homework	35%
Quizzes	35%
Exams	30%
